

- 1) Make sure the lines are short as possible!
- 2) Make sure the bottle is mounted upside down.
- 3) Freeze the bottle before you get it filled. It will fit more liquid CO₂ or nitrous in it.
- 4) Try filling with nitrous. Those guys fill the bottles better so you can at least see what it's supposed to look like.

The purge in the video is the best case. A humid day after a rain storm makes the best purge effect. Typical purge effects are a 4-foot high.... Let us know how you make out.
